

Procedure Code Guidelines

Reimbursement Policy ID: RPC.0017.2100

Recent review date: 05/2024

Next review date: 05/2025

AmeriHealth Caritas Louisiana reimbursement policies and their resulting edits are based on guidelines from established industry sources, such as the Centers for Medicare and Medicaid Services (CMS), the American Medical Association (AMA), state and federal regulatory agencies, and medical specialty professional societies. Reimbursement policies are intended as a general reference and do not constitute a contract or other guarantee of payment. AmeriHealth Caritas Louisiana may use reasonable discretion in interpreting and applying its policies to services provided in a particular case and may modify its policies at any time.

In making claim payment determinations, the health plan also uses coding terminology and methodologies based on accepted industry standards, including but not limited to Current Procedural Terminology (CPT); the Healthcare Common Procedure Coding System (HCPCS); and the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM). Other factors that may affect payment include but are not limited to medical record documentation, legislative or regulatory mandates, a provider's contract, a member's eligibility in receiving covered services, submission of clean claims, and other policies. These factors may supplement, modify, or in some cases supersede reimbursement policies.

This reimbursement policy applies to all healthcare services billed on a CMS-1500 form or its electronic equivalent, or, when billed on a UB-04 form or its electronic equivalent.

Policy Overview

The Procedure Code policy identifies rules and guidelines regarding International Classification of Diseases, 10th revision, Procedure Code System (ICD-10-PCS) and Current Procedural Terminology/Healthcare Common Procedure Coding System (CPT/HCPCS) coding requirements for claim submission to AmeriHealth Caritas Louisiana.

Reimbursement Guidelines

The Health Insurance Portability and Accountability Act (HIPAA) required adoption of specific code sets for diagnoses and procedures to be used in all transactions. For outpatient and professional services, CPT and/or HCPCS procedure codes are required. These codes may require a two-digit modifier to further clarify the

services being billed (example: an anatomical site modifier such as “RC” for right coronary artery). CPT/HCPCS books provide instruction and guidelines for CPT and HCPCS codes.

ICD-10 PCS codes are used to describe the procedure that a provider has documented in the inpatient medical record. The codes must be reported to the highest specificity of the procedure performed. The ICD-10-PCS Official Guidelines *for Coding and Reporting* provide instructions and guidelines for assigning procedure codes.

CMS and the National Center for Health Statistics (NCHS) review and update the guidelines for coding and reporting ICD-10-PCS codes annually along with the code sets. The National Center for Health Statistics releases the updated code set and guidelines. These changes go into effect each year on October 1 for inpatient discharge dates beginning on October 1.

The American Medical Association (AMA) releases CPT/HCPCS code changes and guidelines quarterly which are found on the AMA website. These changes will be added to the updated code set and guidelines annually on January 1. The Louisiana Department of Medicaid may have specific coding requirements for services provided in specific settings.
